Addendum #1 - RFP Flathead County Public Safety Facility Commissioning Agent

The RFP will be amended to include the following information:

PROFESSIONAL LICENSURE AND CERTIFICATION ELIGIBILITY

A proposing company is eligible to submit for this scope of work if its designated Commissioning Authority is either (1) a Montana Professional Engineer registered in a relevant discipline or (2) a Certified Commissioning Professional (CCP) holding a current certification. A Professional Engineer is not required when the company designates a qualified CCP. The County will evaluate firms meeting either qualification on an equal basis, subject to all other requirements of this Request for Proposal.

All other information provided in the Flathead County Public Safety Facility Commissioning Agent RFP remains unchanged.
